AddThis Standard Audiences are created from hundreds of real-time, first-party permissioned data points sourced exclusively from their powerful AI platform. Reach audiences in all major verticals; global, cross device, and in 70 languages.

### AdPrime

AdPrime is the largest healthcare publisher and ad platform online, connecting brands to the consumers they most want to reach in this powerful niche market. We're driven by the needs of the industry, constantly growing and evolving our services with the ever-changing technological environment. We create customized strategies for advertisers, leveraging our expertise, extensive industry reach, advanced targeting, and unparalleled first-party data. For publishers, we serve as a strategic growth partner, introducing them to brands that are most relevant to their content and highly engaged audiences.

### adsquare Alliance

At Adsquare, we created a neutral and transparent marketplace to enable companies make better marketing decisions that result in more relevant customer engagement. Our real-time platform brings together buyers and sellers of data in a fair, secure and privacy-friendly way. We empower our partners and clients with sophisticated, yet easy to use self-service instruments, putting them in control and ensuring full transparency. Our platform processes billions of data points, adds a layer of intelligence and helps making data actionable. To achieve this, we gathered international talent sharing the same vision and passion for cutting-edge technology.

### Adstra (formerly ALC)

ALC data solutions include customer acquisition, i2A strategic planning, nonprofit solutions, smart data solutions, omnichannel solutions, and data monetization. Get access to proprietary omnichannel databases that include Wealth Window, ALC B2B, ALC MD+, Link2Me, Milestones, Newborn Network, and WIP (Wealth, Influence, Power). ALC's clients are in financial/insurance, nonprofit/fundraising, retail/catalog/ecommerce, business, publishing/media, and travel/entertainment.

### Affinity Answers

Through the use of sophisticated machine learning algorithms, Affinity Answers is able to deliver predictive recommendations of key buyer segments derived from 400 million consumers worldwide. These consist of buyers of specific brands that exhibit characteristics and have expressed interest in content, pop culture, events, etc. that marketers can utilize to isolate and target their earned and paid marketing campaigns. Using engagement data from more than 50,000 brands, Affinity Answers applies predictive modeling to identify attributes unique to buyers that include behavior towards other brands, media and entertainment.

### AlikeAudience

AlikeAudience is a data management company that specializes in mobile-first data activation. Our mission is to accelerate the connection of the physical and digital universe for brands through continuous augmentation of trusted data sources.

### Alliant

Alliant delivers audience-based solutions built from transactional data, advanced data science, and high-performance technology. At the core of Alliant's solutions is the DataHub – a unique and secure Member database that aggregates billions of consumer transactions. Alliant provides consumer marketers with innovative, data-driven audience optimization solutions that deliver marketing insight for profitable growth.

### AmeriLINK

Our AmeriLINK consumer database is unsurpassed in its depth and breadth and superior compilation and accessibility. It provides hundreds of data options to precisely target your best prospects or to gain fresh insight into the characteristics and behaviors of your current customers. Identify and reach consumers by such elements as purchase transactions, lifestyle interests, ailments, geographic level information, ethnicity, occupation, families with children, online and offline buyers and responders, homeowners, vehicle owners, donors and veterans.

### Ameribase Digital

Ameribase, powered by Lighthouse List, is a database that includes over a billion interactions through mail, online, and on the phone which consists of 150 million households as well as over 200 million U.S. consumers. E-Dentify™ allows marketers to target at the household and individual level. Over 120 million monthly hashed emails are used to identify search behaviors, and there are more than 100 segments of hobbies and interests to choose from across 50 lifestyle profiles.

### Analytics IQ

Analytics IQ blends cognitive psychology with data science to dive into what motivates people. Their PeopleCore database helps marketers understand 'who' people are (at their core), 'what' actions people take everyday, and 'why' consumers make decisions. Markets they serve include insurance, financial services, retail, automotive, agencies, nonprofits, technology and travel. Their Analytics IQ includes over 1,000 data attributes on more than 116 million households and 217 million individuals.

### ASL Marketing

ASL Marketing has been the nation's premier provider of youth data. We remain committed to providing our clients with the most comprehensive, accurate, and responsive data of high school students, college students, and young adults available anywhere. We provide our partners the most accurate & comprehensive data for reaching the 13-34 year old audience while can be utilized across multiple platforms.

### Audigent

Audigent is a next-generation data management platform and the world's first "data agency," containing some of the most exclusive content consuming audiences across desktop, mobile, and social platforms. Harness the power of activating 100% verified, highly engaged people, not bots, who are current and actively engaging with branded content across the web. Through our tailored, data-driven audience segmentation, we empower you to cut out the fraud and target real verified audiences. All audience data is fully anonymized, contains zero PII, and is 100% GDPR and CCPA compliant.

### Audiens

Our vision goes way beyond simply capturing, unifying and segmenting your customer data. By applying intelligent analysis that pulls in data from a host of other sources, we can identify trends and behaviours you never knew were there and recommend recipes that nudge the right customers at just the right time. Because our platform is built for marketers, not data scientists, we make your customer data work for you, with no IT expertise required. Our Data Auto-Capture technology automatically connects all your data sources and ensures everything is captured perfectly.

## **B**

### BlueKai

Oracle DMP (formerly BlueKai) is the industry's leading cloud-based big data platform that enables marketing organizations to personalize online, offline, and mobile marketing campaigns with richer and more-actionable information about targeted audiences.

### Bombora

Bombora is the leading provider of B2B demographic, firmographic and intent data. Bombora's Company Surge™ Analytics analyzes the business content consumption of millions of B2B organizations and informs businesses when target organizations are indicating active demand for products or services. Bombora captures intent signals and data from across the B2B web, spanning across multiple content sources, and companies that contribute data can join their Data Co-operative. By contributing they get access to the whole dataset and better understanding of their audience composition. Bombora's dataset includes 2.8 million companies, 32.1 billion quarterly content consumption events, 457 B2B targeting segments, and 3,500 sites in their Data Co-op.

## C

### [CACI UK](#)

Our heritage of understanding consumers and their behaviour underpins everything we do and forms the basis of our unique range of solutions. We help our clients to grow their customer volumes and revenue by delivering a connected customer experience. The amazing things we do with data enables us to create unrivaled insight-insight that can lead business change, increase customer engagement and drive digital transformation. We use it to shape digital products, maximise digital acquisition and integrate marketing technology. CACI does amazing things with data. Our database of the UK population is the most comprehensive in the industry with hundreds of pieces of information on each individual. It covers everything from contact details, income, financial products owned and charities supported through to media consumption, digital interaction and channel preferences.

### [Catalina](#)

We harness real-time shopper intelligence to personalize communications, providing shoppers with a seamless and responsive experience across all channels. It's important to identify the right audience so your message doesn't fall on deaf ears. Our Audiences & Data Services provide you with over 700 syndicated segments with unlimited options to customize so you can deliver relevant messages and offers that drive high-quality outcomes. We implement proprietary modeling approaches – predictive, shopper affinity, and reach expansion – to deliver precise and reliable audiences verified by purchasing propensities.

### [Claritas](#)

Our industry-leading Identity Graph unifies data from multiple sources, connecting devices to online behavior in a privacy-compliant manner and into the intelligence you need to execute seamless multichannel engagements. Our multichannel execution solutions coupled with powerful analytics and modeling capabilities will make your marketing more effective and increase the ROI on every dollar. Claritas offers over 8,000 Syndicated Audiences built from over 10,000 demographic and behavioral attributes including four of the industry's most widely used segmentations: PRIZM® Premier, P\$YCLE® Premier, ConneXions®, and CultureCode®. With our innovative AudienceAnywhere® platform, you can unleash the potential of your first-party data by appending our data and building custom and look-alike audiences based on your specific business goals.

### [Clickagy](#)

Clickagy is a leading provider of artificial intelligence-powered behavioral B2B intent data. The company was acquired by ZoomInfo (Nasdaq: ZI), a global leader in go-to-market (GTM) intelligence solutions, in October 2020. Leveraging ZoomInfo's best-in-class B2B intelligence, the acquisition advanced the power of Clickagy's solution, adding new layers of audience customization and visibility to go-to-market teams to introduce first-generation streaming intent data to the marketplace.

### comScore & comScore TV

comScore combines proprietary TV, digital and movie viewing data with vast demographic details to measure consumers' multi-screen behavior at scale with more than 3,200 clients and a global footprint in 70 countries. comScore delivers audience measurement with their Unified Digital Measurement (UDM) methodology, which accounts for all site visitors and helps marketers understand the size and quality of their audience. comScore is a trusted source for precise and reliable TV ratings across the largest media landscape. comScore's consumer-facing clients include agencies, auto, CPG, education, energy, financial services, government, healthcare, investment research, local TV stations, manufacturing, media, movie studios & distributors, national TV networks, operators, pharmaceutical, political advisors, professional services, quick-service restaurants, retail, sports marketers, technology, telecommunications, and travel. comScore offers numerous products with audience analytics, activation, advertising analytics, and movies worldwide.

### Connexity

Connexity's shopping comparison network, which includes Shopzilla, Pricegrabber, and Become.com, uses purchase intent data to connect marketers to in-market consumers. The company's unique data and audience modeling technology powers billions of programmatic display advertisements yearly. Connexity is the industry's second-largest source of shopper leads behind Google, and distributes retail listings for over 175 million products from thousands of retailers. They have grouped data together into audience segments to reach shoppers of 1,400 categories and 7,500 brands. Connexity works with comScore to validate the accuracy of their demographic audiences.

### Crossix

Our solutions and insights help brands gain a deeper understanding of consumer and HCP audiences, activate campaigns with precise targeting, and measure and optimize marketing investments across multiple media channels. Crossix's suite of audience solutions are the most accurate and privacy-safe targeting tools available. Our solutions help leading pharma, OTC and CPG brands ensure that their digital and targeted tv campaigns reach the right health audiences, at scale.

### Cross Pixel

Cross Pixel provides data management software and monetization services to first-party data owners and enable publishers, ecommerce sites, and data owners to generate incremental revenue streams from programmatic advertisers, analytics services, and attribution companies. Cross Pixel's DMP is powered by their proprietary data relationships with more than 5,500 websites and mobile apps where they identify and harvest the shopping and researching behaviors on over 650 million unique browsers. Partners include eCommerce sites, search directories, comparison shopping engines, coupon sites and toolbars across North America and Latin America. Advertisers can access their data and deliver advertising to audiences across thousands of websites with ad formats including pre-roll video, display advertising, social media, text links, content, and more.

### Cuebiq

Cuebiq maintains and provides analysis of the largest, most accurate database of real-time consumer behavior, allowing businesses to glean actionable insights about real-world consumer behaviors and trends. Brands, agencies, financial services, and publishers can all benefit from Cuebiq's products. Their AI-driven proprietary intelligence platform leverages the world's largest, most accurate, and most transparent location-based database that includes over 61 million unique devices, 100+ data points per user per day, and more than 180 partner apps that leverage precise location.

## **D**

### Datacratic

Datacratic's intent-based retargeting technology is now part of Iperceptions. Iperceptions is a global leader in Voice of the Customer (VoC) solutions offering a full range of services including survey design, deployment, reporting, and analysis. Iperceptions helps marketers and brand managers, customer experience professionals, market researchers, web analysts, UX professionals, web managers and app designers. Their industry expertise includes auto, banking and finance, e-commerce, hospitality and travel, telecommunications, and higher education. 1,200+ top brands use Iperceptions in over 80 countries and 35 languages.

### DataCurrent

DataCurrent is a cloud-based engine for hosting and analysing your flow data. We are a web-based GIS data management system used for collecting, analyzing and serving data related to drainage asset condition and performance. It provides a virtually-limitless data storage capacity and powerful analysis engine to produce asset performance information from remotely collected or warehoused data.

### DataLab

DataLab is an analytics-driven addressable marketing consultancy that offers data sourcing, data processing, analytics, and data warehousing. They have more than 300 million prospect records and their DataLab maintains over 75 customer and prospect data warehouses, as well as over 700 predictive models for clients annually. The credit data maintained at DataLab includes full agent copies from all 3 bureaus, each with thousands of attributes, weekly transactional files tracking credit changes across hundreds of attributes, daily inquiry triggers, and a multitude of property and auto x-date fields. Furthermore, DataLab installs, processes, and maintains national files from over a dozen leading national and specialty demographic data providers.

### DataLine

Dataline is a provider of consumer marketing information, digital audiences, and custom modeling and analytic services. Their clients include major publishers, large financial institutions, major insurers, non-profit organizations and well-known catalogers. Dataline utilizes an analytical approach to optimize their database of 240 million individuals, 2,000+ data points, and provides clients with highly targeted prospects with close to 300 million customer transactions per month. Their Audience Predictor custom modeling program and DataLink taxonomy enables the ability to align multi-channel marketing strategies.

### DataMentors

DataMentors is now known as V12 Data after they acquired V12 Group. V12Data delivers omnichannel solutions that signal imminent intent and drive performance for clients. Their data products deliver both depth and breadth covering consumer and business audiences specialized in automotive, financial services, B2B, healthcare, and retail. They house 200 million consumer contacts with full addresses, 180 million VINs, 208 million consumer emails, 300 million monthly cookies, and 1,900 audience segments. Their proprietary data offers comprehensive national coverage based on first-party data assets supplemented with dozens of the most trusted and respected third-party sources. As a result, they are able to provide their clients with the unique ability to identify customers and prospects and unify addressable identities across all devices and channels.

### Datamyx

Datamyx was acquired in 2015 by Deluxe Financial Services. Deluxe helps financial institutions focus on the customer lifecycle, with a growing array of incentive, client-inspired FinTech solutions. Deluxe is a trusted business partner to more than 5,700 financial institutions across North America. Their data includes over 250 million consumers and more 40+ insight models. Deluxe offers solutions for data-driven marketing, treasury management, check & fraud, digital engagement, and more. Deluxe Marketing Solutions uses an advanced data set that incorporates both national and the client's own historical consumer data to define ideal, valuable targets.

### DataXpand

DataXpand serves as an unifying platform to collect, organize and activate your audience data from any source; including online, offline or mobile data. The direct partnership with platforms such as DSPs and AdServers makes your data available to be used for targeted advertising anywhere you need. DataXpand provides granular 3rd Party Data for previously untouched markets including Latin America, US Hispanics & Europe.

### Datonics

We are the Internet's leading independent aggregator and distributor of highly granular and proprietary search, purchase-intent, life-stage, B2B, demographic, POI, and past purchase data. Datonics' 1,500+ pre-packaged segments and an unlimited number of custom keyword-derived segments facilitate the delivery of highly relevant, privacy-sensitive ads to consumers on all of their devices.

### DAX

More people are listening to more audio, on more devices. DAX connects advertisers, brands and agencies with publishers of the world's best audio content. DAX has advanced capabilities to serve, target, scale, track, optimise and report on your direct and programmatic media buys all in one place – saving you time and propelling performance.

### Delidatx

Delidatx is a Data provider an independent DMP that helps publishers monetize their traffic and offers data solutions for advertisers and agencies through an agnostic self-made technology. Improve the effectiveness of your campaigns by discovering your real audience and making sense of data delivering to obtain better media results.

### Dish TV

DISH Media provides advertisers with intelligent solutions to efficiently maximize exposure to desired audiences across DISH and Sling. Through innovative platforms, viewer measurement tools, and access to custom audiences, advertisers can employ strategically positioned, demographically targeted buys that enhance their national media campaigns. With 11 years at the forefront of TV advertising and 7 years of addressable expertise, we're here to tell your story, engage your audience, and help you make a real impression.

### DMD

DMD owns the digital key to identifying your audience, ensuring you can confidently serve ads to your exact, authenticated targets. One-to-one programmatic ad serving starts with a unique digital identifier, the email address. When email data is 100% first-party sourced, opted in, and deterministic, you'll get the most matches, with the greatest opportunity for reaching and engaging your target healthcare providers. DMD provides the only dataset that consists of 100% first-party sourced, authenticated, opted-in records; DMD does not scrape or manufacture records.

### Dstillery

Dstillery is the leading custom audience solutions company, empowering brands and their agencies to maximize the value of customer data and transform the way they connect with their audiences. To perform and achieve brand growth, the smartest data-driven brands know that generic audience solutions fall short. We build just-for-your-brand Custom AI models on 10 million attributes to build your best audiences. Using our proprietary ProspectRank® technology, our Custom AI models score hundreds of millions of candidate members in and out of audiences every 24 hours to identify and activate audiences. These audiences best match your unique BrandSignal®, which is our own version of your brand's physical and digital footprint.

### Dun & Bradstreet

Dun & Bradstreet's systems and databases are powered by over 30,000 global data sources and are updated 5 million times per day, resulting in the world's largest commercial database. They offer products and services including finance, credit & risk solutions, sales & marketing solutions, master data, enterprise analytics solutions, and supply management solutions. CRM partners stream Dun & Bradstreet's business information directly into their applications to append and enrich account details for improved segmentation, prospecting, reporting, and more. Furthermore, marketers and advertisers can utilize Dun & Bradstreet's SIC codes in their targeting strategies, and enterprises embed their credit & risk reports and scores into workflows. The D-U-N-S Number, a unique nine-digit identifier for businesses used to establish a D&B® business credit file, is often referenced by lenders and potential business partners to help predict the reliability and/or financial stability of a company.

## E

### Edmunds

The Edmunds.com Auto Industry Data Center features updated data on car sales, market share, sales forecasts, TCI, consumer trends, safety reports, and vehicle recalls. Edmunds uses third-party advertising serving companies to provide data collection, reporting, ad response measurement, and site analytics, and to assist with delivery of relevant marketing messages and advertisements. These third parties may collect information about your online activities over time on the Edmunds Automotive Network and across other websites and online services. These advertising serving companies may use information (not including name, address, e-mail address, or telephone number) about visits to the Edmunds Automotive Network in order to provide advertisements on the Edmunds Automotive Network and other websites and online services. Edmunds is retiring their API program.

### El Toro

We match physical addresses to IP addresses with extreme precision with our offline data on-boarding capabilities and patented one-to-one marketing technology, allowing you to utilize Account Based Marketing tactics, CRM targeting, and more! El Toro offers multiple advertising products stemming from our IP Targeting algorithm, including Geo-Framing™ targeting technology, all of which are helping change digital advertising.

### Emetriq

Emetriq combines the reach of premium marketers as well as intent data and hard facts from well-known data suppliers in the largest German data pool. The result: Over 100 million active profiles, 600+ target group segments, and deterministic cross-device solutions for the cross-device identification of users.

### Epsilon

Through Epsilon PeopleCloud, the marketing platform for personalizing consumer journeys with performance transparency, Epsilon helps marketers anticipate, activate and prove performance. Powered by CORE ID®, the most accurate and stable identity management platform representing 200+ million people, Epsilon's award-winning data and technology is rooted in privacy by design and underpinned by powerful AI. With full control of customer relationships, you'll draw a line between your marketing investment and real business outcomes. With the industry's #1 consumer database, you'll get a full view of customers and prospects—so you'll predict their future buying behaviors and build a lifetime of loyalty.

### Equifax - IXI

Our exclusive network of 95+ leading financial institutions directly measures about \$20 trillion in anonymous U.S. consumer assets and investments, representing over 45% of all U.S. consumer invested assets. Our patented process collects and classifies anonymous consumer asset data, combines it with proprietary measures of income, discretionary spending, and credit, providing a more complete picture of households' likely financial and economic positions.

### Ericsson Emodo

Emodo offers a variety of inventory and audience solutions that enable advertisers to adjust to changing consumer behaviors. Whether the goal is to drive return foot traffic or convert once-frequent store visitors to digital buyers. Emodo's data-rich device profiles reveal a wealth of revelatory audience location and behavioral patterns. Emodo Insights use aggregated, anonymized data to provide a holistic, uniquely detailed view of where audiences go and what they do. It's powerful intelligence that informs planning pre-campaign or reveals foot-traffic and other lift metrics during the campaign. Emodo uses carrier data as a truth set to identify and eliminate inaccurate inventory, pre-bid. We offer a wide range of solutions including mobile display, audio, video, CTV and more.

### Evite

Evite makes coming together effortless for more than 100 million annual users and 32 million registered users. 2 billion invitations have been sent in company history totaling \$21 billion by users. In 2017, on average, 2% of all traffic directed to evite.com was paid. Evite also provides tracking technologies to collect information about users who view or interact with their services to use for digital advertising campaigns.

### Exelate

eXelate segments, Nielsen's proprietary and highly curated mix of offline/online data, spans multiple behaviors and audiences. The eXelate data pool consists of over 200 anonymous data providers, which are reviewed and put through a QA process prior to being added to the Nielsen Marketing Cloud ecosystem.

### Experian

Experian's business groups include business information, consumer credit services, decision analytics, global consulting practice, marketing services, and partner solutions. Industries they serve are automotive, communications, credit unions, debt recovery, energy, fraud management, health, public sector, utilities, online marketplace lending, and regulatory compliance. Experian's US ConsumerView marketing database is compiled from hundreds of public and proprietary sources and covers over 300 million individuals and 126 million households. Their business database provides comprehensive, third-party-verified information on 99.9 percent of all U.S. companies, with the industry's most extensive data on the broad spectrum of small and mid-sized businesses.

### Experian UK

Experian UK offers numerous business solutions including analytics, business information, consumer credit risk, data quality management, identify & fraud, marketing, payments, and small business solutions. Industries they help include leisure and travel, financial services, retailers, media and entertainment, public sector, and agencies. Through Experian, one can optimize data quality, develop cross-channel identity profiles, and combine with device recognition to see customers across any channel and device. They focus on client's data DNA third-party data to deliver Single Customer Views and cross-channel identity resolution from a single platform. Gain insight into the lifestyles and behaviors of 49 million UK adults, using more than 500 variables. Their data also includes 34 million email addresses linked to geodemographic insight and 20 million phone numbers. Experian Marketing Services' data comes from sources such as government 'open' data, consumer surveys, research data, summarized UK census information, calculations using existing data, and other authorized data providers.

### Eyeota

Eyeota works with marketers, data owners and research companies to provide distinct, comprehensive and qualified audience data. Our technology platform analyzes and transforms this data into relevant audiences marketers can use to enrich their campaigns.

## F

### Factual

Factual is the location data company powering innovation in product development, mobile marketing and real world analytics. Factual's proprietary data assets are created from over 3 billion references to businesses, landmarks, and other points of interest across 100,000+ unique sources. Factual provides some of the highest quality, most extensive location data on more than 130 million places and points of interest across 52 countries. Factual's Geopulse Audience, powered by their Observation Graph, enables advertisers to target based on real behaviors so they can reach the right consumers with the right message every time.

### Fifty

Fifty is a technology company focused on large scale analysis of Social Media data to fundamentally redefine how organisations understand and engage their customers. We examine tens of millions of consumers, and billions of data points that describe their relationships and engagement. It's a huge step forward from the surveys of the past – instead of extrapolating from a tiny sample, we provide accurate data across the entire digital world.

### Financial Audiences

Financial Audiences is an audience management and targeting platform providing powerful tools for deep audience insights and sophisticated cross-channel targeting as well as a trusted environment for publishers to monetize audience and data assets. Financial Audiences has over 10 million unique users, 150 million page views, and 5 million email addresses. Millions of unique profiles are categorized into four primary financial segments including personal finance, individual investing, business finance and professional investing, as well as hundreds of sub-segments to choose from. Target exclusive publisher display, mobile, native and email inventory traditionally or programmatically. Their audiences are built using exclusive first-party data collected from their publisher partners and organized into an industry first data taxonomy.

### Fluent

Fluent is a first-party, data-driven targeting solution for digital marketers. Our data is self-declared from millions of opted-in and anonymized users.

### Forbes

Forbes Media is a global media, branding and technology company with a focus on news and information about business, investing, technology, entrepreneurship, leadership, and affluent lifestyles in America. Forbes.com has 59 million unique monthly visitors, a 6.2 million audience readership, and more than 30 million social followers. Forbes documents and promotes innovation across a broad range of platforms and industries including digital, mobile, magazines, video, live, and BrandVoice.

### Foursquare

Fueled by Foursquare's location data, Pinpoint is our cross-platform managed service media offering. We capture your target audience at key moments with the right creative because we understand how your customers move throughout the world. We design custom audiences combining the attributes that best characterize your customers based on their real-world behaviors. Our audience data includes chains, categories, lifestyle, lifestage, and even online interest behavior.

## G

Solutions they offer include online pricing intelligence, brand and customer experience, point of sales analytics, digital market intelligence, consumer panels, product catalogs, market opportunities & innovation, distribution & supply chain management, geomarketing, media measurement, mystery shopping, point of sales tracking, promotion & causal retail, shopper, social media intelligence, trends & forecasting, and user experience.

### Global Data Resources

Our unique data-driven, human-led, and technology-powered approach creates the trusted, actionable, and forward-looking intelligence you need to make faster, more informed decisions. Our primary insights into B2B and B2C audiences globally means that you can better understand your customers, and your customer's customer, and deliver a profitable product strategy that meets client needs. We combine unique types of data around markets, competitors and customers so that you can develop a differentiated and holistic go-to-market proposition that aligns with customers and wins more business.

### Grab

Grab is Southeast Asia's largest mobile technology company that connects millions of consumers to millions of drivers, merchants, and businesses. Grab is taking on the largest problems that affect the region, including access inequality, outdated infrastructure, and income disparity. GrabAds can help you identify and target specific audiences by making the right ad placements at the right place and time, both online and offline. With our extensive on-ground fleet and rich digital presence, we can integrate your marketing communications across touchpoints to work seamlessly and more effectively.

### Gracenote

Gracenote helps people connect to the music, TV shows, movies and sports they love across the world's most popular entertainment platforms and devices, from Apple to Amazon to Telekom Deutschland and Tesla. We provide music, video, and sports data.

### Gravy

Gravy Analytics is the leading provider of real-world location intelligence for marketers. Our patented AdmitOne™ engine verifies mobile consumer attendances at millions of places, points-of-interest, and local events, providing unprecedented insight into consumer activities and interests. Advertisers rely on Gravy Audiences to power precision-targeted mobile advertising campaigns. Brands trust Gravy Insights to provide unmatched customer and competitive intelligence. Gravy Analytics processes billions of location signals each day from its nationwide base of opted-in, anonymous mobile devices for unparalleled reach and scale. Gravy Audiences fall into four distinct categories: B2B, In-Market, Lifestyle, and Enthusiast, representing a broad range of interests in specific products and services.

### Ground Truth

GroundTruth is the leading location data platform. Our platform provides the easiest and most effective way to integrate location technology into your marketing strategy. If you're looking to increase brand awareness, drive store visits or uncover insights about your key audience, we have the tools and expertise to help you exceed your goals and KPIs. We've built the only proprietary mapping technology designed with the specific intention of location-based marketing, called Blueprints. Once we've verified the location signal and matched it to a place, the final step is determining whether a visit has actually occurred. We look at a number of contingencies that enter into the complex equation of whether we deem a visit to be 100% verified.

## **H**

### HealthLink Dimensions

Our Data Solutions deliver exceptionally comprehensive contact databases with rich, accurate, and continuously updated information on healthcare professionals. These offerings include both public and private resources, giving healthcare marketers breadth and depth that other solutions and in-house efforts cannot match. Data Solutions compiles detailed contact lists for the following essential healthcare marketing segments: Healthcare Professionals, Facility demographics, Physician networks, and Physician group practices.

### HG Data

HG Data uses its proprietary platform to index billions of unstructured business-related documents from offline and online resources. We go well beyond the digital signature information commonly found on public websites, processing content such as case studies, press releases, content libraries, government filings, and more to produce a detailed and accurate profile of the business needs, installed technologies, services, and other habits and interests of companies.

### Hitwise

Hitwise is a leading audience insights tool that helps marketers, agencies, and brands track website behavior across all industries, understand their audience, and keep tabs on their competition. Hitwise and Connexity, their parent company, provide marketers with insights and audience activation. Their service indexes millions of data points against each of the 650 million addressable devices to build a specific audience. Data includes an 8 million person panel, 20 million websites, 3.5 million mobile devices, 60 thousand audience attributes, and 500 million searches monthly. They utilize observed online behavior, consumer surveys, and shopping profiles to compile unique data sets. They offer solutions for consumer insights, competitive intelligence, audience activation, and search insights.

### HiveWyre

HiveWyre's advertising program provides customized advertising solutions to our partners using second party data. This targets your unconverted, in-market shoppers to your online retail business from competing sites in real-time. HiveWyre takes the guesswork out of prospecting by reaching shoppers who've already shown interest by actually shopping for a similar product elsewhere. We get your brand and message in front of them during their shopping experience. By forming data partnerships with over 500 retailers, HiveWyre is able to use second-party data to put your product in front of new customers that are already shopping for it.

### **I**

### I360

I360's dual customer base of political organizations and commercial clients presents a unique variety of business requirements to encourage cross-application of practices between verticals. I360 has a comprehensive database of all 199 million American voters containing thousands of pieces of individual and aggregated information. Their data also includes 290 million consumers, 101 million identified individuals, 311 million matched devices, and 1800 unique data points. Clients can leverage this and their capabilities in data science, analytics, technology, development and advertising.

### iBehavior

KBM Group acquired iBehavior in 2010. The iBehavior Data Cooperative is the premier consumer transaction data provider that helps multi-channel merchants invest marketing dollars more efficiently. They are the only cooperative to offer behavioral targeting across all channels: postal, online, email, mobile, and in-home addressable. 2,800+ retail and catalog merchants contribute purchase transaction data to iBehavior, including more than 12 billion SKU-level transactions. This represents more than \$460 billion in B2B and B2C purchases made by 190 million individual purchasers through online and offline channels.

### ibotta

Ibotta is the #1 shopping rewards app for driving new customers, bigger baskets, and more trips. We track SKU-level purchases from millions of consumers each month. All purchases are deterministically linked to consumers on a 1:1 basis. Ibotta is uniquely positioned to track a consumer's purchase behavior across all retail channels and formats including Big Box, Grocery, Club, Drug, and Convenience. Ibotta's SKU-level purchase data is collected directly from our owned and operated mobile app, providing advertisers complete transparency into the source of our data.

### iCumulus

We use company data, personal and measured expertise and advanced technology to create specialized and integrated actions that lead to successful business results.

### Infogroup

Infogroup is a big data, analytics and marketing service provider that delivers in-class, data-driven, customer-centric technology solutions. Their data and SaaS offerings help clients of all sizes, from small companies to Fortune 100™ enterprises. Business units include: Yes Lifecycle Marketing, Infogroup Data Solutions and Infogroup Local Marketing Solutions. Products include: Data Axle, Marketing Genetics, Marketzone, Bulk Update, Sapphire, Express Update, InfoUSA, Salesgenie, Credit.net and ReferenceUSA. Infogroup provides both digital and traditional marketing channel expertise and access to their proprietary data on 245 million individuals and 25 million businesses. They verify their data at a rate of almost 100,000 phone calls per day, and also provide point of interest data to the leading in-car navigation systems in North America.

### InMobi

Leverage InMobi's technology platform and exclusive access to mobile intelligence, and create new paths to understand, identify, engage and acquire consumers. Use carrier signals and massive global scale to laser-focus your targeting and reach your precise audience every time. Unique audiences crafted from extensive data sets provide a holistic view of the customer for deeper context and greater personalization.

### Insticator

Insticator gives Publishers the power to embed our interactive ad unit with its companion display and video ads. Customize the location of the video and display ads to adapt perfectly to the context in which you want to engage your readers.

### Intimate Merger

Intimate Merger is one of the biggest DMP specialized companies in Japan. It won the top place in the public DMP market in Japan ranking three years in a row. We provide web performance data of the audience visiting our partner's media as well as data estimated from statistical processing of a consumer panels provided by media research companies. In addition, we aggregate data based on keywords extracted from consumer contact via our partners.

### IRI

IRI provides integrated big data, predictive analytics, and forward-looking insights all on a single leading technology platform, IRI Liquid Data®. The platform helps CPG, over-the-counter health care, retail, and media companies personalize their marketing and grow their businesses. IRI delivers growth to clients through six areas of expertise: market performance & strategy, consumer & shopper, in-market execution & analytics, media, retail, and technology. 95% of CPG, retail, and health and beauty companies in the Fortune 100 work with IRI. Their industry-leading partnerships with Kantar Shopcom, Oracle Datalogix and Experian contribute to their data sets.

### IXI

The IXI Network offers solutions based on wealth. Equifax's data-driven marketing capabilities deliver insights about clients' customers, their household economics, and ultimately, their needs and preferences. Industries IXI services include auto, banking & lending, brokerage, communications & digital media, energy, insurance, restaurant, retail & consumer goods, travel, leisure & entertainment. Through a network of financial institutions known as the IXI Network, Equifax directly measures approximately \$15 trillion in anonymous U.S. consumer assets, and investments, representing 47 percent of all U.S. consumer invested assets. Their solutions provide insights on consumer financial capacity, investment style, behaviors, and characteristics.

## K

### Kantar Media

Kantar Media's Atelier suite of tools enables agencies to manage media planning and buying. The service is based on currency audience data, rate card, and competitor information. It covers internet display, mobile, radio, print, cinema, and beyond across France, Russia, Kazakhstan, Poland, Belgium, Norway and Italy. In particular, they provide the reference tool for radio and internet, involving a complete set of modules: ranking, multi-dimensional mapping, duplication, cross-tabbing, plan scheduling & optimizing, graphics, and more. These enable planners to identify and understand a wealth of comparative data across different media to target specific audiences. In addition, their suite of Instar software has been developed to help analyze viewing behavior, TV planning and buying efficiency, and social TV.

### Kayak

Reach the travelers you want, the moment they need you. Amplify your brand to an engaged audience that's in-market and eager to book. Get real-time insights on in-market travelers. Customize your campaigns to provide travel solutions. Using our custom tools and features, build campaigns that drive brand, awareness, performance and more.

### Kochava Collective

Curated and validated dataset with more than 1.3 billion monthly active mobile devices including app usage, location visitation, device details, interests, digital purchases, and user demographics. By leveraging robust audience creation tools with a rich dataset, Kochava offers both syndicated and custom audiences across every major brand vertical and form of key behavioral targeting.

## L

### Leiki

Leiki provides SaaS solutions for semantic context-based intelligence, intelligent user profiling, and audience segmentation. Industries they serve are publishers, ad tech, advertisers, retail & ecommerce, and finance. Leiki has a proprietary natural language analysis ontology with more than 200,000 topics that empowers their text & user interest analysis, content discovery, and audience segmentation engine. They focus on providing audience and content data services and content discovery services. Their technology helps publishers, retailers, and advertisers understand their user interests with SmartProfiles, increase advertising income with SmartSegments, and show their audience relevant content across sites with SmartMedia.

### Lifesight

Your customers have countless behavioural traits, enrich their data with 100+ online and offline attributes. Map the enriched data with existing data to discover unknown patterns that can't be found in your data. Distribute data anywhere and send your enriched data to any social, programmatic, marketing automation, business intelligence or data warehouse. Build lookalike audiences and extend your audience reach by targeting new similar customers across our consumer database.

### Live Nation

Live Nation offers standard and custom ad opportunities across screens, for both display and video, across our network of owned and operated and partner sites. From direct buys to programmatic, our offerings are strategically deployed on behalf of brands to reach the right audiences at the right time, making an impact where and when it matters most. Live Nation's Social & Proximity products combine social partners, proprietary technologies and smart location-based marketing capabilities to target relevant fans before, during and after any event, wherever they consume media.

### Liveramp B2B

We've created a platform where you can activate your first-party data and connect it with the best ethically-sourced third-party data – to build richer profiles of the audiences you care about, and power smarter campaigns to engage them, then accurately measure the impact of your marketing. Using LiveRamp B2B's universal identity graph, personal and organizational identifiers – like emails, postal addresses, and phone numbers – are connected to anonymous identifiers – like cookies and device IDs in a privacy-conscious way. These connections allow you to reach the people and accounts you want to sell into and attribute the interactions to individuals across any channel or technology platform.

### Lotame

Lotame offers a DMP, data exchange, and an audience optimizer, as well as cross-device, data stream, onboarding, syndicate, and aiTV. Lotame's audience segments, consisting of billions of cookies and mobile device IDs, are available in more than 40 advertising platforms including Google, The Trade Desk, AppNexus, and more. These segments are also available directly within Lotame's DMP, giving every marketer, agency, publisher and platform access to their third-party data. In addition to offering billions of data points collected from their network of publishers with over 50,000 profile attributes, Lotame offers access to over 5,000 global ready-to-target, pre-packaged audience segments and exclusive co-branded partnerships.

### Lovoo

Millions of our users log in to LOVOO each day to get to know new people and discover new things. They have a high affinity for technology, are socially active, and open-minded. And wherever they happen to be: With our advertising program, you reach them directly, without any detours. Whether it's an app promotion, display marketing, or branded challenges: We offer you the opportunity to speak to a young and involved target group and present your brand in a unique environment. With our campaigns, you will achieve your business goals quickly and easily.

## **M**

### Mastercard Advisors

Mastercard Advisors, the professional services arm of Mastercard, provides near real-time transaction data and proprietary analysis, data-driven consulting, and marketing services solutions. They provide insights for financial institutions, local banks & credit unions, merchants, advertisers, and governments. They also offer data & analytics, loyalty solutions & marketing campaigns, and consulting services. Mastercard Advisors provides access to 43 billion anonymized, near-real transactions from 2 billion cardholders in 210 countries worldwide. Data & analytics uses transaction data overlaid with insights from industry experts to deliver information for media, risk, businesses, and payments.

### MasterCard Smart Audiences

Mastercard Audiences are powerful behavioral based segments derived from actual anonymized transaction data. Advertisers are enabled to reach the most relevant consumer populations based on real world spending insights. Mastercard's standard segments are available in three categories. Leverage insights from the power of aggregated spend data to identify: (1) Top Tier Spenders, (2) Frequent Transactors & (3) users In the Market to spend by category. Maximize your ROI with Mastercard standard, seasonal or custom insights. Mastercard Audience data is collected through brick-and-mortar, e-commerce and mobile transactions processed by Mastercard Worldwide's payment card network.

### MedData Group

MedData Group is the leading provider of Healthcare Professional (HCP) data solutions for fueling multichannel digital advertising programs. With a database of more than 2 million HCP records, we offer a portfolio of highly flexible, innovative data solutions that allow for sophisticated and accurate segmentation and targeting of HCP audiences at the National Provider Identifier number (NPI) level and at the largest scale available. In addition to standard segments, we provide extensive custom audience segmentation based on a wide range of clinical behavior (Rx, Dx, Px), demographic, firmographic, and other professional data fields.

### Media Source Solutions

Media Source Solutions offers digital/display advertising, mobile, lead generation, hyper-local advertising, big data, consumer packaged goods buying behavior, demographic online/offline consumer behavior & demographic data, and retargeting. Industries served include retail, automotive, travel, health & beauty, environment, cruise, underbanked, home improvement, debt/ payday loans, and family. Media Source Solutions offers a 125 million cookie-based user pool, and as the exclusive list manager for the BuyerSourceUSA email and postal file, they have identified the interests, demographics & psychographics, and buyer attributes of over 12 million consumers.

### MeritDirect

MeritDirect is a data-driven marketing company and provider of global omnichannel solutions, offering integrated marketing through a wide array of products and services. MeritBase™ is the industry's premier B2B list-specific cooperative database. For acquisition efforts, over 1,800 lists are available to mailers, all on a list-specific basis. Their b2bBase(SM) is a multi-million name database of business-to-business multi-buyers created through MeritDirect and Experian's collaboration.

### Merkle

Merkle helps over 400 world-class clients with customer strategy, performance media, customer experience & personalization, customer relationship management, loyalty marketing, and enterprise technology services. Merkle's proprietary data set, DataSource, provides insights to auto, finance, interest & lifestyle, personas, demographics, purchase, and home & real estate. They have numerous clients in travel, media & entertainment, B2B, wealth management, technology, insurance, health, retail, nonprofit, and financial services. They manage 3.7 billion first-party customer records and manage \$1.5 billion in global media. They deliver 10 billion personalized emails and over 20 million mobile messages annually. One of Merkle's featured products is M1™, which is Dentsu Aegis Network's 100% people-based insights, planning, activation, and measurement platform.

### Moat

Moat provides real-time, multi-platform, and actionable marketing analytics, including measuring real-time Attention Analytics over 33 billion times per day. They focus on campaign, creative, domain, URL, placement, author, and impression transparency. Moat has over fifty metrics in video and display that pass Media Rating Council scrutiny.

### MobileWalla

Mobilewalla observes mobile behavior across the world capturing 1.1 billion consumer footprints, including 487 million devices observed in the US alone from 300 million consumers. Mobilewalla segments are derived from the hundreds of millions of mobile consumer profiles created and maintained by Mobilewalla. Their segments are composed of directly addressable device IDs.

## N

### Narrative

Instantly access trillions of raw data points from 40+ data providers. Narrative makes it fast and easy to discover and access the precise information you need to help you increase your speed to market, save money, and reduce risk. Narrative's Data Discovery Assistant allows users to find high-value attributes suitable for a variety of data needs in an intuitive and easy-to-understand interface—whether as a marketer seeking to improve personalization, an analyst conducting competitive analysis, or as a data scientist feeding predictive models.

### Navegg

Navegg is a leading provider of Latin American online audience data. By analyzing navigation habits, interests, and web audience behavior on desktops or mobile devices, Navegg provides exclusive data on more than 400 million Internet users. They work with brands and publishers to help them identify their best audiences.

### NcSolutions

NCSolutions delivers expert insights based on buyer behavior to connect brands with buyers faster, more efficiently, and with better results. Our research-based insights, collective wisdom and proven techniques help brands target the right segments based on in-store purchase behaviors, optimize campaigns while in-flight and measure the resulting incremental sales. As a strategic partner, we ensure our clients are always at the forefront of advertising effectiveness.

### Near

The data platform derives actionable intelligence from unique, large scale datasets in a privacy-safe manner by using AI/ML models. Curate bespoke audience with real-world data and activate them on programmatic platforms. Create custom audiences with online & offline world data and get real-time audience estimates across digital channels

### NetWise

The Industry's most complete B2B Audience Data, backed by our proprietary B2B-to-Consumer ID Graph. Create audiences as broad as you want, or as targeted as you need. Reach the same person at work and at home, across every channel, on every device, via any sales or marketing platform. Our ID-Graph allows complete, accurate, and expansive B2B Targeting.

### Networkld

We aggregate and classify intent data from Discuss.com.hk, Price.com.hk and Uwants.com, which are the top discussion forums and price-comparison / e-commerce websites in Hong Kong.

### Neustar

Neustar is a global information services provider offering marketing, risk, security and communications solutions. Industries they serve include retail and consumer packaged goods, financial services, automotive, travel & hospitality, communications and technology. Their industry-leading authoritative identity and extensive partner ecosystem eliminate the low-quality linkages that lead to media waste. In addition to onboarding, Neustar lets you segment, activate, and measure on that data. This allows you to syndicate audiences across multiple devices, retarget customers on every channel and device, target the best customers and prospects, optimize the media mix with intuitive analytic dashboards, and determine true online/offline ROI with closed loop analysis. Their data is validated through 2 million inbound connections a day. They have one of the largest networks of offline data in the industry: 120 million US households, 220 million US adults, 500 million email addresses, and 500 million phone numbers.

### Nielson

By connecting clients to audiences, we fuel the media industry with the most accurate understanding of what people listen to and watch. To discover what audiences love, we measure across all channels and platforms—from podcasts to streaming TV to social media. And when companies and advertisers are truly connected to their audiences, they can see the most important opportunities and accelerate growth.

### NinthDecimal

NinthDecimal is a marketing platform powered by location data. Their platform enhances the location data with a combination of engagement, demographic, contextual, first & third-party data, spend data, time of day, day of week and other factors to deliver the audience that is most relevant for a brand. NinthDecimal processes trillions of data points from over 230 million unique devices every month to power its product suite. Companies activate NinthDecimal's customer intelligence through audience targeting, measurement, insights and data licensing solutions. Location Graph is one of the most precise audience intelligence technology in the market. It is a multi-layered learning machine built on data from over one billion anonymized devices. They have taken the time to accumulate exact property boundaries for virtually the entire United States. Location Conversion Index (LCI ®) is the leading offline 11 attribution solution with over 200 integrated media and advertising partners.

### Nordic Data Resources

We use census data to segment geographical neighborhoods in key Nordic consumer markets. Our lifestyle personas are built from real census data. They are solid, and stable over time. We segment neighborhoods, not individuals. Our targeting is 100% GDPR compliant

### Novantas

Novantas is a leading fintech provider of advanced decision support systems and data, supporting banks in advancing their customer growth strategies. The company licenses cross-bank data, predictive scores, and advanced analytical platforms that empower financial institutions to become more precise, nimble, and economic as they transition customers into a digital world.

### ○

### OmniDIGITAL

Omni Lightning is a tracking software that integrates with your point-of-sale system (POS) and allows for tracking with Facebook and Instagram ads. It allows you to place ads in front of everyone in your POS system. Allowing for a higher lifetime value amongst your existing customers.

### OnAudience

OnAudience provides Big Data tools and services for online marketing in over 40 markets in Europe and North America. It is a tailor-made solution for performance marketing focused on customers and e-commerce platforms. The company has one of the largest third-party data sets in the world that consist of over 9 billion user profiles. OnAudience integrates data management, including DMP and Data Exchange with programmatic buying, including DSP and Mailing Exchange. A reported 600 million users have ad blocking software worldwide. OnAudience's UnBlock is a simple way to discover ad blocking and protect revenues. UnBlock provides full support for all popular advertising formats including HTML5, Rich Media, Video, and OpenRTB SSPs.

### oneAudience

oneAudience, a leading mobile data intelligence provider, connects mobile app usage with offline and online data. Their deterministic individual profiles allow advertisers to discover unique mobile audiences across every major vertical and enhance their data-driven marketing strategies. oneAudience data uncovers hidden mobile insights including consumers' favorite apps. They deterministically match each mobile device to an individual's email address, demographics, lifestyle data and purchase behaviors to provide a complete view of the customer and create powerful audience segments. With deterministic device ID matching, every impression, every conversion, and every click can be tied back to one identifiable consumer with a rich profile full of actionable data.

### OneData

High-performance data management solution that offers unified data access across globally distributed environments and multiple types of underlying storage, allowing users to share, collaborate and perform computations on the stored data easily.

### Oracle

Discover what makes your audience take action and where to engage them, with Contextual Intelligence and audience solutions from Oracle Data Cloud. Protect against fraud while ensuring your ads are in view and appearing alongside safe, relevant content. Drive campaign success with solutions for viewability, invalid traffic, and brand safety. ### Orb Intelligence

Acquired by Dun & Bradstreet

### OS Data Solutions

As one of the largest German data pools, OS Data Solutions combines the digital reach of Ströer with qualitative intent and purchase data from the Otto Group. Based on more than 37 million CRM data, we offer advertisers and agencies premium data products for display, mobile and video campaigns in order to target over 50 million unique users.

### OwnerIQ

OwnerIQ has built a thriving second-party data marketplace, allowing marketers at retailers, brands and all company types to operate in a more transparent data economy with access to audience data that is relevant and effective. Second-party data is sourced transparently from the marketing partners a brand is already working with, or brands that share data with non-competitive brands in exchange for compensation. OwnerIQ's real-time decisioning engine was custom built around their unique data set. It includes 1.3 trillion impressions process monthly, over 500 billion opportunities seen across mobile devices, over 600,000 data points calculated on every opportunity, 2.6 billion interactions with cataloged products, and 1.6 billion interactions with cataloged brands. CoEx is OwnerIQ's proprietary audience platform that supports their second-party data marketplace.

## P

### Pacific Data Partners

Pacific Data Partners is the largest B2B data marketplace with more than 50 billion data records compiled for use in marketing, sales, and analytics use cases. We work with premium B2B and B2C data providers to bring high-quality and interconnected B2B data to market. Their data products include a standard data taxonomy as well as custom data segments tailor made to achieve specific goals. Pacific Data Partners provides more than 800 B2B audience segments, over 350 consumer audience segments as well as custom Account Based Marketing and Technology Based Marketing segments to use. With access to data on more than 300 million professionals, rich insights on 30+ million companies and detailed analytics on more than 50K technologies, Pacific Data Partners has compiled the most comprehensive B2B data asset available. These B2B audiences can be leveraged through their syndicated taxonomy as well as through custom audiences. Additionally, Pacific Data Partners provides a comprehensive set of self-declared demographic, interest, past purchase, and real estate audience segments.

### PeerLogix

PeerLogix offers the level of granularity we are able to include in the taxonomy of our data sets. Our direct pipeline and position 'in the stream' allow us to create and identify content markers that offer far deeper audience insights. Advertisers leveraging PeerLogix data are able to create completely custom data sets that target viewers not only by genre of programming they consume, but by the actual titles they watch, the channels those title originate from, the studio that produced the title and even by the actors/actresses that appear in the content.

### Pelmorex

As a leader in unified-cross platform and location based data, we are uniquely positioned to deliver high impact solutions. Our data drives decision making in areas such as sales, marketing and product development. Our large reach and highly engaged users contribute to data solutions and insights. Which in turn delivers improved results. Data keeps getting bigger and with our experience Pelmorex Data Solutions knows a thing or two about turning data insights to analytics. Over the decades, we've accumulated a wide and deep pool of data that gives us insights into how to efficiently and effectively reach consumers. With Pelmorex Data Solutions, our expert team of data gurus leverages that user data to get the most out of your marketing strategies and targeting efforts. We've developed and refined our geosegmentation capabilities and use that information to tell a compelling consumer story.

### PeoplefindersDaas

PeoplefindersDaaS provides custom audience creation and ready-made "deterministic only" data segments for Marketers, Agencies and Platforms executing Sales, Marketing and Analytics/Measurement mandates. We provide the fastest execution in the industry, typically measured in hours – speed to market is critical to our clients and they appreciate our commitment to conform to their timelines.

### [Pinsight Carrier Consortium](#)

Pinsight is the leading source of audiences built upon carrier-level first party mobile data. A 24/7 in-depth view of your target audience that's as fresh and fluid as their minute-by-minute behavior. From verified demographics to custom audiences, be confident you're reaching your best customers. If you want to target based on real people, you start with mobile data at the carrier-level. We analyze the app usage, mobile web behavior, and persistent location of tens of millions of users every day to reveal the authentic mindsets of consumers.

### [Placed](#)

Placed was acquired by Foursquare in 2019.

### [PlacelQ](#)

PlacelQ is a leading data and technology company that helps businesses leverage location-based insights to connect with and understand audiences. They offer advertising, measurement, analytics, and data-as-a-service. LandMark by PlacelQ provides seamless access to premier location data for cutting-edge analytics. They created Darwin, which is a proprietary filtering technology that identifies and removes fraudulent and inaccurate location data. Location data can be even more powerful when it's combined with other data sets. PlacelQ works with partners every day to amplify the power of location with premier third-party data.

### [Powered by Inscope](#)

Inscope's TV audience viewing data is leveraged by brands, agencies, networks, measurement companies, DMPs and marketing technology platforms to power massive transformations in the industry. Optimize your time, money and effort. Combining unparalleled scale with more reliable, accurate viewing data from millions of TVs produces granular data for greater precision and unprecedented ad measurement.

### [Precise Target](#)

PreciseTarget's unique shopper data helps apparel retailers and brands acquire and understand their highest-value customers. By applying deep data science, artificial intelligence, and machine learning to billions of retail transactions, PreciseTarget has developed the only dataset that profiles consumers' preferences and tastes. The result is that you acquire customers with lower bounce rates and a higher likelihood to make repeat purchases. Because when you offer people what they really want, you sell more stuff.

### Profound Networks

Profound Networks provides planetary-scale business insights through internet mapping with over 235 million global domains and 4 billion IP addresses. They offer data mappers, domain append, address append, and IP validation. The Digital Business Intelligence (DBI) database captures both routable & non-routable domains as well as IP addresses and refreshes them quarterly. DBI currently tracks approximately 80 technology attributes for each domain and has several hundred more attributes in various stages of development and testing. DBI is used by Fortune 500 companies for a variety of business related tasks, processes, projects & programs in the fields of marketing, competitive intelligence, market sizing, territory mapping, sales, finance, supply-chain management and more. Other uses include traffic analysis, security, predictive analytics, viability studies, and measurements. DBI is a multiple-language supported product.

### Publishers Clearing House

Publishers Clearing House is a leading direct-to-consumer company offering a unique blend of curated multi-channel shopping and free-to-play, chance to win digital entertainment across a network of web and app-based entertainment properties. Data and analytics have been at the core of the PCH business strategy for more than 60 years. With a strong foundation of consumer loyalty and direct relationships, PCH has evolved into a multi-channel media company that combines digital entertainment, commerce and direct-to-consumer marketing, creating an attractive destination for consumers, marketers, and retailers alike.

### PushSpring

PushSpring provides audience data, insights, and publisher solutions with the ultimate goal of activation. The PushSpring Audience Console offers mobile app audiences at scale. They use advanced machine learning techniques applied to billions of monthly mobile app and device-level signals so their data scientists can create targeting personas and custom segments. PushSpring offers audience data across 200 million targetable mobile device IDs and 200 million targetable cookies. You can create, view and export custom segments in minutes to tailor ones mobile targeting strategy with verified device-level data.

## Q

### Qualia

Qualia identifies in-market audiences by collecting and analyzing online and offline consumer actions (product comparisons, wish list additions, store visitation, etc.) coming directly from our website, app, and SDK partners. Their data stands out because they only collect declarative signals expressed by consumers and their proprietary IQ algorithm evaluates each signal based on strength, recency, frequency, and dwell time. They ingest multiple actions performed across multiple devices creating a holistic view of the in-market consumer, as opposed to simply classifying a consumer as in-market based on one action. Qualia has in-app data available, which covers 16 categories including technology, travel, entertainment, and shopping.

### Quotient

With data on over 76 billion retail item transactions and 4 billion digital coupon activations annually, Quotient lets you efficiently and precisely target audiences, personalize creative, measure sales results and optimize campaigns in a closed-loop.

## R

### Rakuten Insight JP

Rakuten Insight, Inc., a wholly owned subsidiary of Rakuten, Inc.\*, is a market research firm founded in Japan. Utilizing state-of-the-art technology and leveraging synergy within the Rakuten Group, Rakuten Insight offers professional marketing research services for its clients. By conducting not only online surveys, but also research planning, proposals and analyses by experts, large-scale panel systems and its innovative technologies, Rakuten Insight is able to offer unique and innovative solutions to the highest standards of quality for its clients.

### Ranker

Ranker is a leading digital media company for opinion-based crowdsourced rankings on just about everything. With one of the world's largest opinion databases, Ranker has collected more than 350 million votes on over 100,000 people, places, and things. Ranker attracts more than 50 million monthly unique visitors and over 80 million visits worldwide and is a top ranked publisher in the US. Ranker is built on consumer engagement. Their data and technology allow them to micro-target ads and deliver insights about audiences and brands unlike any other site on the web. Lists and video are the heart of what they do, and they offer a variety of advertising opportunities in display, branded & sponsored video, mobile, and social media amplification that get brands results.

### Retargetly

Retargetly is the leading independent DMP and Data Exchange that focuses on Hispanic audiences. They power publishers, marketers, and advertising agencies from U.S., EMEA, and Latam with proprietary segmentation technology and audiences that deliver results. Through their Smart DMP solution—the first freemium data management platform for publishers—and exclusive partnerships with top selected data providers, they collect data across multiple online and offline properties and offer the best Hispanic and Latino audience segments for both branding and direct-response campaigns.

### Roy Morgan

Roy Morgan gives you the power of the world's best market research data in ready-made reports and profiles with latest research statistics, information and news. This includes consumer satisfaction reports, customer profiles and industry reports relevant to your target audience.

## S

### [Samba TV](#)

Samba TV is redefining the broken TV measurement model of the past half century, delivering truth to publishers about the programming audiences watch and enabling marketers to meet the consumer on their terms, with relevant and impactful engagements. Use our data to reach cord-cutters and other light TV viewers in your target audience and deliver relevant ads to viewers' phones, tablets, PCs, and CTV based on what they watch on TV.

### [Scanbuy](#)

The ScanLife Mobile Engagement Platform offers easy-to-use mobile marketing solutions for brands, agencies, and retailers. The platform provides the tools you need to track the performance of campaigns using QR Codes, NFC triggers, and other consumer-friendly mobile technology. Scanbuy is a leading SmartLabel QR code service provider helping brands deliver the transparency consumers are demanding. Consumers simply scan QR Codes on product packages to gain instant connections to specific information supplied by the brand owner. With their enterprise-class platforms, industry experience, and IP protection, they have activated thousands of packages on behalf of brands wanting to deliver on the SmartLabel promise.

### [Semasio](#)

Gain complete control, transparency, and ownership of your targeting with Semasio. We understand pages and users on their own terms – the terms pages contain and users consume on those pages. This empowers you to seamlessly target both users and pages executing a truly Unified Semantic Targeting strategy. We provide audience, contextual, and brand fit targeting.

### [Semcasting](#)

Semcasting pioneered the use of IP targeting with machine learning to maximize customer reach on any device with complete transparency. Our twice patented technology allows organizations to onboard CRM data, create new prospect audiences, identify qualified leads, and monitor audience performance.

### [ShareThis](#)

ShareThis is the leading source of online behavioral data across the open web. With a global network of 3M publisher domains, the ShareThis network captures shares, searches, clicks, and pageviews, providing a dynamic and comprehensive picture of consumer interest and intent. Marketers can leverage this proprietary, real-time data to better understand their audiences and connect with them in the moments that matter most. ShareThis is the largest independent source of online, real-time, interest and intent data. Our data is global, transparent, and proprietary. ShareThis offers over 1,000 vertical, seasonal, life event, demographic, b2b, and intent audiences.

### SirData

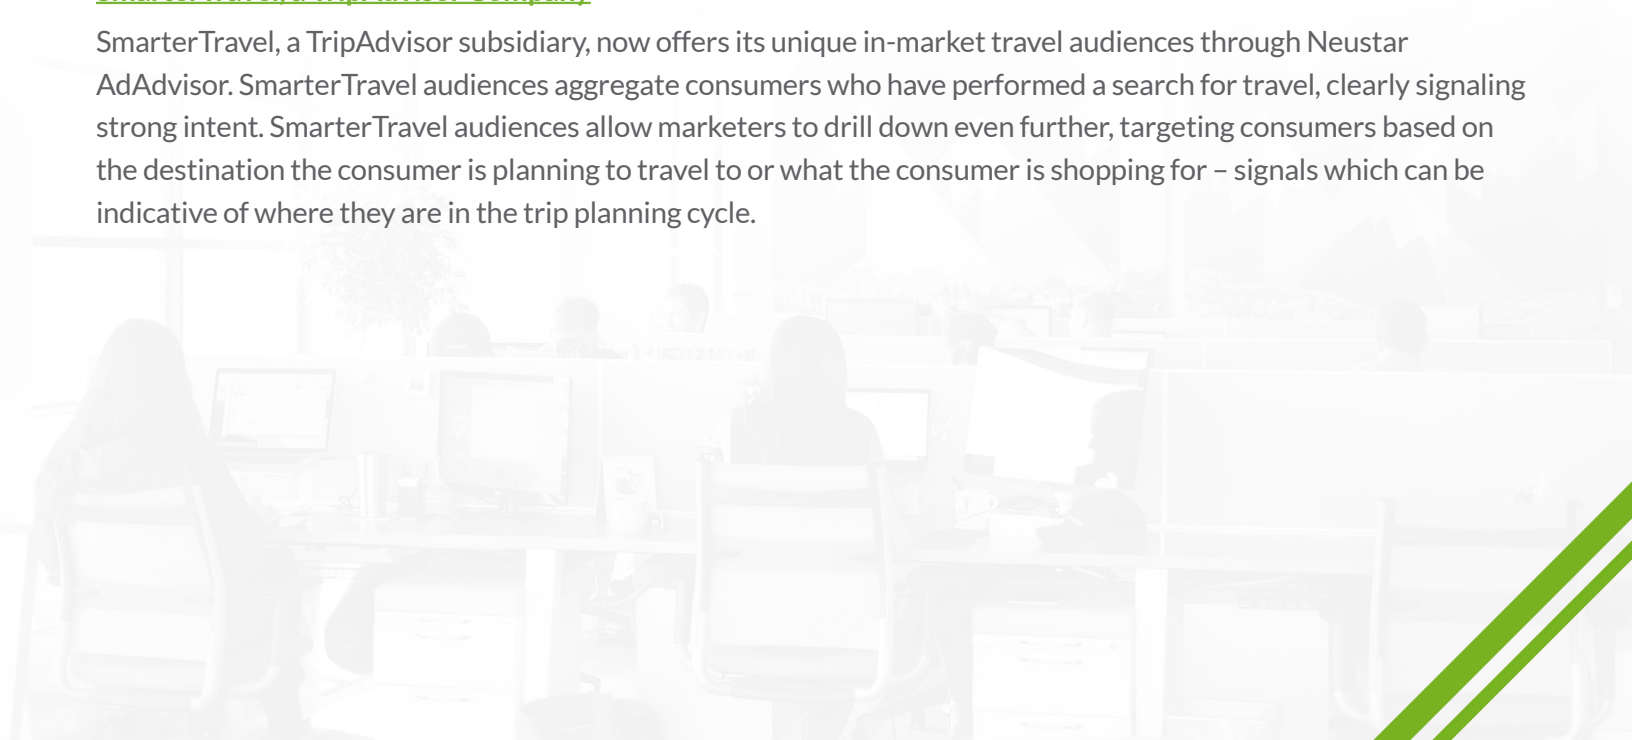

Supported by a network of more than 150 publishers, SirData collects and processes the browsing data of web users. Through semantic analysis, they uncover users' intent and interest signals on each web page to score precisely their browsing behaviors and content consumptions. They offer pretargeting and enrichment solutions. Sirdata's advanced data analysis turn browsing behaviors and content consumptions into intent signals for highly qualified live audience segments, including more than 400 prebuilt audience intent and interest segments for seamless targeting and more than 2500 categories refreshed in real-time for customized audience segments. They also have over 330 million cookies and operate in five countries. Sirdata connects with technological marketing platforms—DMPs, CRM platforms, DSPs, and UX personalization solutions— to activate its audience pools and monitor cross-channel and personalized marketing tactics.

### Skimlinks

Skimlinks is a global leading content-to-commerce platform helping marketers find people who want to buy their products as well as publishers looking to monetize their editorial content. Skimlinks works with merchants, brands, publishers, blogs & editorial, news sites, online communities, content networks, mobile apps, and commercial platforms. They create new revenue for publishers by automatically affiliating links in content and syndicating the behavior data to marketers for use in advertising. Skimlinks is used on 1.5 million websites globally by more than 57,000 publishers, and they process millions of transactions every day. Over 4.6 billion page impressions generating 14.6 billion API calls a month go through their system, with a response time of fewer than 150 milliseconds. Last year, their network drove more than \$1 billion of e-commerce transactions. Data buyers can get insights from 1.1 billion cookies.

### SmarterTravel, a TripAdvisor Company

SmarterTravel, a TripAdvisor subsidiary, now offers its unique in-market travel audiences through Neustar AdAdvisor. SmarterTravel audiences aggregate consumers who have performed a search for travel, clearly signaling strong intent. SmarterTravel audiences allow marketers to drill down even further, targeting consumers based on the destination the consumer is planning to travel to or what the consumer is shopping for – signals which can be indicative of where they are in the trip planning cycle.

### Solve Media

Solve Media is owned by Adiant, a digital media technology company with a mission to deliver innovative solutions for advertisers and publishers. Solve Media's proprietary TYPE-IN™ advertising guarantees messaging won't be ignored as it lets users type in brand messages where they interact on web pages and mobile apps—replacing CAPTCHAs, allowing people to skip video pre-roll ads, or unblocking access to valuable mobile experiences. Solve Media's WiFi Unlock™ uses branded ad interactions that offer free public WiFi. Solve Media's security solution was developed as a platform to help differentiate humans from automated bots. It is designed to protect website publishers from automated submissions, spam, attacks, and other types of fraudulent activity. Solve Media provides a security platform that thousands of website publishers implement through a Turing test, otherwise known as a CAPTCHA or HIP, to validate the authenticity of end users.

### Specialist Marketing Services

Specialists Marketing Services, Inc. is a data-driven, multi-channel marketing company that provides strategic customer acquisition services to leading brands, agencies, and Fortune 500 companies. As a leading provider of direct marketing lists, including our CustomerConnect360 (CC360) and Business Intelligence Solutions files, we leverage data-driven strategies to target the right audience across multiple channels including direct mail, email, digital, and social media. CC360 is built through proprietary methodologies using response, transactional, warranties, surveys, new mover, and public records and it offers the richest consumer data available today. The Business Intelligence Solutions (BIS) Database is a multi sourced business file containing postal, email, phone numbers, and deep business demographics.

### StartApp

Access hundreds of user segments, each containing millions of active consumers. Segments include custom-made audiences or a selection of pre-packaged audiences from shopping behaviors to demographic characteristics, product affinities, carrier subscriptions and many more. Segments are activated across multiple platforms and can be integrated into your own data sets.

### Statiq

Acquired by Telefónica's Axonix

### StatSocial

StatSocial has developed a proprietary data-centric approach to help clients know, segment, and reach their social audiences. They have identified over 600 million social profiles, defined across over 40,000 distinct segments. They acquire essential insights across 60+ social networks and every major blogging platform. With 40,000+ defining variables, one gains keen marketing insights about audience composition and its characteristics in a highly flexible manner. Their recently introduced Twitter affinity graph enables revolutionary insight into an audience's interests. They uncover and categorize more than 370 interest categories and expose affinity scores for more than one thousand TV shows, thousands of consumer brands and more than twenty thousand celebrities. Their data scientists have modeled the entire US population into 200 unique clusters. Using billions of inputs for over 120 million US consumers, they have segmented naturally occurring population clusters across distinct demographic and household types, personality traits provided by IBM Watson, combined with people's passions, which they have source from their social activities online.

### Stirista

Stirista now offers digital solutions for online audience targeting, providing more than just basic demographics. Use Stirista's powerful B2B and B2C data to find the customers that matter to you. Our data files are verified for accuracy and enhanced with both offline and online data to give you the most complete picture of your ideal customer.

## **T**

### Tagtoo

Tagtoo is a leading Dynamic Product Ads (DPA) platform in Asia, providing the best online ads experience for both advertisers and audience. Tagtoo focus on digital advertising display technology to reach potential customers cross border and cross screen. ### TapAd

By creating not only the first, but the most robust global cross-device digital identity graph on the market, Tapad has partnered with brands to maximize their digital marketing investment for years to come. The Tapad Graph enables marketers to identify a brand customer or related household across multiple devices, unlocking key use cases across programmatic targeting, media measurement, attribution, and personalization globally.

### TG360

With data collected from marketing/advertisement service providers for many years, TG360 developed a DMP solution that collects/ segments/ analyzes Big Data. TG360 is different from other DMP providers that merely collect and sell data, by having the largest volume and highest quality of data, and the analytical skills to categorize data. TG360 analyzes and categorizes a large volume of data into more than 250 “Interests” categories every day using AI and Machine Learning analytical skills and guarantees to provide the most recent behavioral data of audiences. We use the integrated online and offline behavioral data to enhance targeting digital advertisement area as well as to gain customer insights and to develop new products.

### The AdEx

The ADEX data marketplace is our solution to actively distribute various of your data without inventory enforcement by having just one central point of contact: our platform. Use standard segments or customized audiences you want to share. There has never been an easier way of deciding who can buy your data and making the most of your audiences. 3rd-party data sales can be done at every relevant DSP, SSP, Exchange, AdServer and DMP that comes to mind. We enable the selection of a huge list of standard segments, which can be activated and used immediately in every system available. In addition to that you can customise segments based on your specific, individual requirement for each partner.

### The Yellow Pages

Promote your business online where consumers aren't just searching...they're buying. Consumers don't just browse internet directories; they search them, because they're ready to contact a business or make a purchase. With Extended Search Solutions on Yellowpages.com, Yelp.com, Superpages.com, Dexknows.com and our extended search partner network, consumers can always find you when they need you most.

### ThinkNow

ThinkNow enables companies and government agencies to discover the cultural drivers that influence consumer decisions. ThinkNow ConneKt is a multicultural MarTech audience planning and segmentation tool that combines behavioral mobile data, first-party data, and panel profile insights to create a holistic view of your target market. They provide insight solutions to help organizations thrive in a changing demographic environment. ThinkNow also owns and operates one of the largest and most representative Hispanic online panels in the industry, DigaYGane.com, which is used to service their own research as well as provide sample to the leading market research companies in the world. ThinkNow Research provides full-service market research services to federal government agencies including full data security compliance, nationally representative samples, hard-to-reach/niche audiences, and experience in handling sensitive or confidential topics.

### TiVo Research

TiVo Research analyzes set-top box data with first-party, digital, purchase, and location-based consumer data. Their analytics software, along with TiVo's data and advertising products, uncovers behavior patterns and provides predictive, actionable insights to maximize TV inventory value and drive audience loyalty across screens. They match reliable, single-source TV data streams in the industry with household-level behavioral data—purchase, retail, online and more—for greater efficiency. With 2 million active households in all 210 DMAs plus TiVo's matching algorithms for both digital and linear reporting, their dataset is competitive and refreshed monthly. In addition to Guide Advertising, TiVo also offers Sponsored Discovery, leveraging areas beyond the guide, such as recommendations carousels, where people discover content and are truly engaged. They also offer one-of-a-kind Sponsored Experience inventory that lives within the sought-after TiVo set-top-box footprint. TiVo's Advertising is a unique and effective way to reach millions of households across entertainment providers and devices.

### TownWiFi

TownWiFi Analytics determines the prospective customers who purchase products from the target store based on the huge amount of WiFi connection information collected in the automatic WiFi connection app "Town WiFi". Then, by detecting that the identified prospective customer connects to the store's WiFi, it is possible to measure whether or not they actually visited the store. Prospect customers are extracted based on gender, age, whether they are within the business area of the target store, and whether or not they visit the store. Discover the best timing for the best prospects.

### TransUnion

TransUnion offers numerous products and solutions that provide complete and multidimensional information to understand customers for informed decisions that create opportunities for businesses. This includes access to more than 200 million files profiling nearly every credit-active consumer in the United States. Their database maintains approximately 500 million business and client credit histories worldwide, provided by more than 85,000 credit-granting institutions. TransUnion Marketing and Audience segmentation solutions help identify leads for new offers and cross-sell, optimize channel strategies and engage consumers more effectively—both offline and online. TransUnion's IDVision (SM) suite of solutions allows you to push good customers through while proactively identifying fraudulent situations; reduce risk, manual reviews & back office expenses; gain a complete view of online & offline consumer identities; and make better, faster verification decisions.

### Tru Optik

Tru Optik powers targeted advertising across the streaming media ecosystem. Each of our solutions is powered by our patented Household Graph of more than 80 million homes. The result is a portfolio that enables the world's leading brands, agencies, media companies and platforms to identify, engage and measure audiences across OTT, streaming audio and cloud-based gaming with unmatched scale, accuracy and privacy compliance.

### TrueData

TrueData provides verified, high-quality mobile data and the machine learning engines to build audiences that both deliver and consistently improve with time. Take smarter actions by analyzing the customers of 6,000+ major companies, or profiling your customers against thousands of mobile-first attributes.
